

TCCS FRAMEWORK

PredPol allows for a more focused response to spikes to block high probability criminal opportunities.

INTEGRATION

PCR & Self-initiated

Radar & Flare-ups

TCCS Priorities

General PredPol Directive

DATA-GENERATED PRIORITIES EXAMPLE

Sector 3

Flare-ups

- Weekly Vehicle Prowl report
- Vehicle Prowls at Wapato Park during the day, possibly related to the release of prolific offender Shaun Barrett

TCCS

- Threshold Spike in Commercial Burglary
- Related to storage unit burglaries occurring at night

PredPol General Directive

- Day: Residential Burglary
- Swing: Residential Burglary and Vehicle Prowl
- Grave: Vehicle Prowl, MVTR, and Commercial Burglary during Grave

- Command has the flexibility and options to send resources to any combination of priorities.
- Not mutually exclusive priorities.
- Commanders can use PredPol in conjunction with the TCCS priority, flare-ups, general directive, and community policing concerns.
 - Extra attention to PredPol boxes around Wapato Park, and storage unit facilities.
 - Example: Sector 3 Lt would request that sector patrols emphasize PredPol boxes around the park for swing and the second-half day shift or assign CLOs rather than request “extra patrols to the park”.
 - This not only focuses the response, but removes redundancy and any notion of conflicting priorities to the officers.
 - *Note: only applies to PredPol property crimes; other crimes may require a different response.*
